

# The many benefits of the ORIGINAL grated decking for docks!

## SAFE

- 360° non-slip surface
- No puddles or splinters!
- ADA compliant
- Very strong

## DURABLE

- Impervious to rot, mold, algae & insects
- UV package designed for Southern Florida exposure
- Anti-static additive
- Excellent warranty

## STORM RESISTANT

- Minimizes the effect of uplift on decking surface from wind and water (storm surge)
- Docks with ThruFlow have survived hurricanes in Florida where ALL other docks have been destroyed

## EASY TO INSTALL

- Interlocking tabs ensure alignment
- Very light-weight and easy to carry
- Saves on labour and uses half the fasteners – do more projects with the same resources or simply save up to 1/2 on labour!

## MAINTENANCE-FREE

- No staining
- No painting
- No sealing
- No warping
- Stays clean without any special or expensive cleaning products

## COOL & FOOT-FRIENDLY

- Grated design and material combine to limit any retention of heat in product
- Massages bare feet with unique non-slip surface

## ATTRACTIVE

- Clean lines and timeless design lend an attractiveness to the product that will last

## ENVIRONMENTALLY-FRIENDLY

- Allows sunlight to penetrate, minimizing the effect of the walking surface on the plants and animals below
- Army Corps of Engineer approved in Florida over submerged aquatic vegetation (sea-grass, mangrove habitat, etc.)
- Will not leech chemicals
- Is recyclable
